

About Us

To meet an ever-expanding need for psychiatric services in West Michigan and beyond, Pasadena Villa Great Lakes provides a residential facility for adults (18+) with complex mental health disorders and co-occurring substance use conditions.

Pasadena Villa Great Lakes provides a modern aesthetic in a therapeutic environment, ideal for healing and recovery. The facility includes areas for reflection, outdoor walking trails, a pond water feature, and a state-of-the-art wellness and fitness center.

What We Treat & How We Treat

At Pasadena Villa Great Lakes, we treat a wide range of mental health disorders using evidence-based approaches tailored to each individual's needs. We offer multiple treatment options in an environment that promotes health, recovery, and personal motivation. Our programs are heavily rooted in our Social Integration Model, which is based on the belief that it's our utmost responsibility to prepare our clients for life after treatment.

- Thought disorders

Levels of Care

Residential Treatment

Our intensive residential program provides 24/7 supervision and support in a structured, therapeutic environment. Clients live onsite, receive continuous care, participate in specialized therapies, and build essential skills for lasting recovery. Each individualized treatment plan is designed to educate, empower, and promote sustained recovery.

Partial Hospitalization Program (PHP)

Our partial hospitalization program (PHP) offers the highest level of outpatient care, providing structured, full-day treatment five days a week while allowing clients to return home in the evenings. Experienced clinicians develop individualized treatment plans for each client to address their unique needs and promote meaningful, lasting progress.

Intensive Outpatient Program

Our intensive outpatient program (IOP) offers a flexible treatment option for individuals transitioning from a higher level of care or seeking additional support while balancing work, school, or other commitments. Clients participate in a minimum of three days per week, with individualized plans that adapt to both clinical needs and life's demands.

Care Through Culinary™

Food is often an overlooked component of quality care. However, we've found that serving high-quality, thoughtfully prepared, fresh, and nutritious food directly impacts how clients approach their treatment. Nourishing the mind and body is part of our whole-person approach to care, as it helps accelerate each individual's path toward recovery.

For us, culinary excellence means nourishing the mind and body through well-balanced meals, building supportive communities with others during meals, or enjoying foods that may be new along with the familiar smells and tastes of home.
